

Name: _____

Date: _____

Solve each problem. Show your work in the box.

Write your final answer on the answer line (or in the blanks shown).

Use the strategies you learned in Lesson 5.02.04.

1 Write the Expression

Write a numerical expression for each phrase. Do not evaluate.

(A) The sum of 14 and 9, then tripled

(B) 5 less than the product of 8 and 6

(C) The quotient of 56 and 8, increased by 12

SHOW YOUR WORK

Expressions _____

2 Evaluate Each Expression

Find the value.

$$4 \times (11 + 9) \div 5 = \underline{\hspace{2cm}} \quad | \quad (3^2 + 7) \times 2 = \underline{\hspace{2cm}}$$

Answers _____

3 Match Expression to Phrase

Draw a line matching each expression to its phrase.

Write one more expression-phrase pair of your own.

Answers _____

Expression: $3 \times (4 + 5)$ Phrase: 4 more than the product of 3 and 5 _____

Expression: $3 \times 4 + 5$ Phrase: 3 times the sum of 4 and 5 _____

Expression: $3 \times 5 + 4$ Phrase: 5 more than the product of 3 and 4 _____

4 Bake Sale

Mira baked 4 batches of 12 muffins and 3 batches of 8 cookies. She gave away 10 treats total.

Write one expression that represents the total number of treats remaining. Evaluate it.

Expression and Answer _____

5 Two Ways to Write It

Kai says that "twice the difference of 20 and 8" can be written as $2 \times (20 - 8)$ or as $(20 - 8) + (20 - 8)$.

Evaluate both expressions. Are they equal? Explain why or why not.
