

Name: _____

Date: _____

Solve each problem. Show your work in the box.

Write your final answer on the answer line (or in the blanks shown).

Use the strategies you learned in Lesson 5.02.05.

1 Write and Solve

Write an expression and find the answer.

(A) There are 6 shelves with 15 books each. 9 books are checked out. How many remain?

(B) A class collected 48 cans on Monday and 32 on Tuesday. They split them equally into 4 bins. How many cans per bin?

Expressions and Answers _____

2 Two-Step Problem

A theater has 12 rows with 18 seats each. Tickets cost \$9 each. The theater sells out.

Write a single expression and evaluate it to find the total ticket revenue.

Expression and Answer _____

3 Reading Challenge

Leo reads 25 pages on Monday, 30 pages on Tuesday, and the same amount each day Wednesday through Friday (15 pages each day).

Write one expression and evaluate it to find the total pages Leo reads.

Expression and Answer _____

4 Fundraiser Goal

A school's goal is to raise \$500. Class A raises \$8 from each of its 24 students. Class B raises \$7 from each of its 28 students.

Write an expression to find the combined amount raised. Did the school meet its goal? Show your work.

Expression and Answer _____

5 Create a Word Problem

Atlas evaluates the expression $(5 \times 12) + (3 \times 8) - 20$ and gets 56.

Verify Atlas's answer. Then write your own word problem that this expression could represent.

Verification and Word Problem _____
