

Name: _____

Date: _____

Solve each problem. Show your work in the box.

Write your final answer on the answer line (or in the blanks shown).

Use the strategies you learned in Lesson 5.06.05.

1 Word Problem – Fraction ÷ Whole Number

Sophia has $\frac{3}{4}$ of a pizza. She shares it equally among herself and 2 friends.

What fraction of the whole pizza does each person get?

Answer: _____

2 Word Problem – Whole Number ÷ Fraction

A trail is 6 miles long. Markers are placed every $\frac{1}{4}$ of a mile.

How many markers are placed along the trail (not counting the start)?

Answer: _____

3 Two-Step Problem

Kai has 2 liters of juice. He pours $\frac{1}{2}$ liter into each cup, then splits what remains equally into 3 bottles.

How many cups does he fill, and how much juice goes in each bottle?

Cups: _____ Juice per bottle: _____

4 Choose the Operation

Mira's garden bed is $\frac{5}{6}$ of a meter long. She wants to plant seeds every $\frac{1}{6}$ of a meter.

Write a division equation that matches this story and find the answer.

Equation and answer: _____

5 Write Your Own

Write a real-world word problem that can be solved with $4 \div \frac{2}{3}$. Then solve it.
