

Name: _____

Date: _____

Solve each problem. Show your work in the box.

Write your final answer on the answer line (or in the blanks shown).

Use the strategies you learned in Lesson 5.12.04.

1 Plot Points on a Coordinate Graph

Plot: A(2, 5), B(4, 3), C(0, 7), D(6, 0).

Write the coordinates of a point that lies on the x-axis.

D(6, 0) lies on the x-axis (y-coordinate = 0). _____

2 Identify Coordinates

P is 3 units right and 4 units up from the origin. Q is 5 units right and 2 units up.

Write the coordinates of P and Q.

P(3, 4); Q(5, 2). _____

3 Distance on a Graph

Two points share the same y-coordinate: A(1, 6) and B(7, 6).

Find the horizontal distance between them.

$7 - 1 = 6$ units. _____

4 Plot and Connect

Plot and connect: E(1, 2), F(5, 2), G(5, 5), H(1, 5).

What shape is formed? Find its perimeter.

Rectangle. Width = $5 - 1 = 4$ units; Height = $5 - 2 = 3$ units. Perimeter = $2(4 + 3) = 14$ units.

5 Reasoning: Kai's Mistake

Kai plotted the point (4, 7) by going 7 units right and 4 units up.

What mistake did Kai make? Where should the point actually be?

Kai reversed the coordinates. The first number (4) is the x-coordinate (go right) and the second (7) is the y-coordinate (go up).
