

Name: _____

Date: _____

Solve each problem. Show your work in the box.

Write your final answer on the answer line (or in the blanks shown).

Use the strategies you learned in Lesson 5.15.01.

1 Meaning of Percentage

A percentage means 'per 100.' If 30 out of 100 squares are shaded:

What percentage is shaded? What percentage is not shaded?

30% shaded; 70% not shaded. _____

2 Shade the Grid

A 10×10 grid represents 100%.

How many squares represent 45%? Describe how you would shade them.

45 squares. Shade any 45 out of the 100 squares. _____

3 Percentage from a Part

Out of 100 students, 62 ride the bus to school.

What percentage ride the bus? What percentage do not?

62% ride the bus; 38% do not. _____

4 100% = the Whole

A pizza is cut into 100 equal pieces. Kai eats 35 pieces.

What percentage did Kai eat? What percentage is left?

Kai ate 35%. 65% is left. _____

5 Reasoning: Leo's Claim

Leo says 110% is impossible because percentages only go up to 100.

Do you agree? Give an example of when a percentage greater than 100% makes sense.

Disagree. Percentages can exceed 100% when comparing to a base amount. For example, if a plant grew from 20 cm to 50 cm,
