

Name: _____

Date: _____

Solve each problem. Show your work in the box.

Write your final answer on the answer line (or in the blanks shown).

Use the strategies you learned in Lesson 5.15.03.

1 Percentage to Decimal

Convert 45% to a decimal.

Divide by 100 or move the decimal point two places left.

45% = 0.45. _____

2 Decimal to Percentage

Convert 0.78 to a percentage.

Multiply by 100 or move the decimal point two places right.

0.78 = 78%. _____

3 Multiple Conversions

Convert each: 0.06 to a percentage; 1.3 to a percentage; 5% to a decimal; 120% to a decimal.

Show each conversion.

0.06 = 6%; 1.3 = 130%; 5% = 0.05; 120% = 1.2. _____

4 Order on a Number Line

Order from least to greatest: 0.5, 35%, 0.09, $\frac{1}{4}$.

Convert all to decimals first, then order them.

$35\% = 0.35$; $\frac{1}{4} = 0.25$. Order: 0.09, 0.25, 0.35, 0.5. _____

5 Reasoning: Atlas's Conversion

Atlas converts 7% to a decimal and writes 0.7.

Find his error and explain the correct conversion.

Atlas moved the decimal one place instead of two. $7\% = \frac{7}{100} = 0.07$, not 0.7. _
