

Name: _____

Date: _____

Standards: MA.5.AR.2.1-2.4

Answer each question. Show your work when asked.

This check covers the lessons listed above.

1 Evaluate with ParenthesesWhat is $(6 + 4) \times 5$?

Answer: _____

Answer _____

2 Evaluate without ParenthesesWhat is $6 + 4 \times 5$?

Answer: _____

Answer _____

3 Exponent FirstWhat is $3^2 \times 4 - 6$?

Answer: _____

Answer _____

4 Order of OperationsEvaluate: $48 \div 6 + 2 \times 3$

Answer: _____

Answer _____

5 Left to RightEvaluate: $36 \div 4 \times 3$

Answer: _____

Answer _____

6 Insert ParenthesesInsert one pair of parentheses to make this true: $5 + 3 \times 2 = 16$

Answer: _____

Answer _____

7 Write the Expression

Write a numerical expression for: 'Triple the sum of 7 and 5.'

Expression: _____

Answer _____

8 Word Problem Expression

There are 4 bags with 9 apples each, and 6 apples left on the counter. Write one expression for the total.

Expression: _____ Value: _____

Answer _____

9 Classify

Which operation do you perform first in $8 + 2^3 - 4 \times 3$?

Circle: Addition / Exponent / Subtraction / Multiplication

Answer _____

10 Is Mira Correct?

Mira evaluates $3 + 5 \times 2$ as $(3 + 5) \times 2 = 16$ because she learned to work left to right.

Is Mira correct? Find the right answer and explain her mistake.
