

Name: _____

Date: _____

Standards: MA.5.DP.1.1-1.2; MA.5.GR.4.1-4.2

Answer each question. Show your work when asked.

This check covers the lessons listed above.

1 Find the Mean

Data set: 14, 18, 22, 16, 20.

Find the mean.

 $(14+18+22+16+20) \div 5 = 90 \div 5 = 18$. _____**2 Find the Missing Value**

The mean of 5 numbers is 30. Four of the numbers are 25, 35, 28, and 32.

Find the fifth number.

Total = $30 \times 5 = 150$. Known sum = 120. Fifth = $150 - 120 = 30$. ____**3 Read a Line Plot**

A line plot shows daily temperatures: 72°F (2 days), 75°F (3 days), 78°F (4 days), 80°F (1 day).

What is the mode temperature?

78°F — it appears on 4 days, the most. _____

4 Coordinate Plotting

Point A is 4 units right and 6 units up from the origin.

Write the coordinates of point A.

A(4, 6). _____

5 Straight Line Graph Rate

A straight line graph shows: at 2 hours a runner has gone 14 km; at 4 hours, 28 km.

What is the running rate in km/h?

$14 \div 2 = 7$ km/h. _____

6 Mean from a Line Plot

A line plot: 3 points (2 students), 4 points (3 students), 5 points (5 students).

Find the mean score.

Total = $(3 \times 2) + (4 \times 3) + (5 \times 5) = 6 + 12 + 25 = 43$. Students = 10. Mean = $43 \div 10 = 4.3$.__

7 Coordinate Distance

Points R(2, 9) and S(2, 3) are on a graph.

Find the vertical distance between them.

$9 - 3 = 6$ units. _____

8 Create a Table for a Graph

A plant grows 4 cm per week.

Create a table for weeks 1 through 4 and predict the height at week 6.

Week 1: 4 cm; Week 2: 8 cm; Week 3: 12 cm; Week 4: 16 cm. Week 6: 24 cm. _____

9 Interpret a Graph

A straight line passes through (0, 0) and (5, 35).

What is the rate of change (unit rate)?

$35 \div 5 = 7$ per unit. _____

10 Is Sophia Correct?

Sophia says the mean of 10, 20, and 30 is 25.

Check her work and explain any error.

$(10+20+30) \div 3 = 60 \div 3 = 20$. Sophia is incorrect; the mean is 20, not 25.
