Date: \_\_\_\_\_

Solve each problem. Show your work in the box.

Write your final answer on the answer line (or in the blanks shown).

Use the strategies you learned in Lesson 5.03.05.

**1 Divide 3-Digit by 2-Digit**

Find each quotient.

$$168 \div 12 = \underline{\quad\quad} \quad | \quad 195 \div 13 = \underline{\quad\quad} \quad | \quad 224 \div 16 = \underline{\quad\quad}$$

Answers \_\_\_\_\_

**2 Estimate, Then Divide**

Estimate first using compatible numbers. Then find the exact answer.

(A)  $378 \div 18$ : Estimate  $\approx$  \_\_\_\_\_; Exact = \_\_\_\_\_

(B)  $315 \div 21$ : Estimate  $\approx$  \_\_\_\_\_; Exact = \_\_\_\_\_

### 3 Long Division Practice

Use long division to find the quotient and remainder.

$$256 \div 15 = \underline{\quad} \text{ R } \underline{\quad} \quad | \quad 389 \div 24 = \underline{\quad} \text{ R } \underline{\quad}$$

### 4 Seed Packets

A garden center has 345 seed packets to pack into boxes. Each box holds 23 packets.

How many full boxes can be packed? How many packets are left over? Show your work.

### 5 Adjust the Quotient

Sophia estimates  $288 \div 32 \approx 10$ , so she tries 10 as her first quotient digit. She checks:  $10 \times 32 = 320$ , which is too large.

What should Sophia try next? Find the correct quotient for  $288 \div 32$  and explain the adjustment process.
