

Name: _____

Date: _____

Solve each problem. Show your work in the box.

Write your final answer on the answer line (or in the blanks shown).

Use the strategies you learned in Lesson 5.04.02.

1 Find the Common Denominator

Find the least common denominator (LCD) for each pair.

$$\frac{1}{3} \text{ and } \frac{1}{4} \rightarrow \text{LCD} = \underline{\hspace{2cm}} \quad | \quad \frac{2}{5} \text{ and } \frac{1}{6} \rightarrow \text{LCD} = \underline{\hspace{2cm}} \quad | \quad \frac{3}{4} \text{ and } \frac{5}{8} \rightarrow \text{LCD} = \underline{\hspace{2cm}}$$

Answers _____

2 Add Unlike Fractions

Find each sum. Simplify if possible.

$$\frac{3}{4} + \frac{1}{3} = \underline{\hspace{2cm}} \quad | \quad \frac{2}{5} + \frac{1}{6} = \underline{\hspace{2cm}} \quad | \quad \frac{1}{2} + \frac{3}{8} = \underline{\hspace{2cm}}$$

Answers _____

3 More Addition

Add. Write answers as fractions or mixed numbers in simplest form.

$$\frac{5}{6} + \frac{3}{4} = \underline{\hspace{2cm}} \quad | \quad \frac{2}{3} + \frac{5}{9} = \underline{\hspace{2cm}} \quad | \quad \frac{4}{5} + \frac{7}{10} = \underline{\hspace{2cm}}$$

Answers _____

4 Recipe Problem

A recipe calls for $\frac{2}{3}$ cup of oats and $\frac{3}{4}$ cup of flour.

How many cups of dry ingredients are needed in total? Show your work with equivalent fractions.

Answer _____

5 More Than a Whole?

Kai adds $\frac{3}{4} + \frac{1}{3}$ and gets $\frac{4}{7}$ because he adds the numerators AND denominators.

Show the correct method and answer. Explain why you cannot add fractions by adding numerators and denominators separately.

Correct Answer and Explanation _____
