

Name: _____

Date: _____

Solve each problem. Show your work in the box.

Write your final answer on the answer line (or in the blanks shown).

Use the strategies you learned in Lesson 5.04.03.

1 Subtract Unlike Fractions

Find each difference. Simplify if possible.

$$\frac{3}{4} - \frac{1}{3} = \underline{\hspace{2cm}} \quad | \quad \frac{5}{6} - \frac{1}{4} = \underline{\hspace{2cm}} \quad | \quad \frac{7}{8} - \frac{3}{4} = \underline{\hspace{2cm}}$$

Answers _____

2 More Subtraction

Subtract. Write answers in simplest form.

$$\frac{4}{5} - \frac{1}{3} = \underline{\hspace{2cm}} \quad | \quad \frac{11}{12} - \frac{5}{8} = \underline{\hspace{2cm}} \quad | \quad \frac{2}{3} - \frac{3}{8} = \underline{\hspace{2cm}}$$

Answers _____

3 Find the Missing Fraction

Find the missing fraction that makes each equation true.

$$\frac{5}{6} - \underline{\hspace{2cm}} = \frac{1}{4} \quad | \quad \underline{\hspace{2cm}} - \frac{2}{5} = \frac{1}{3} \quad | \quad \frac{3}{4} - \underline{\hspace{2cm}} = \frac{1}{6}$$

Answers _____

4 Paint Cans

Mira has $\frac{5}{6}$ of a can of blue paint and $\frac{1}{4}$ of a can of yellow paint.

How much more blue paint does she have? Write your work using equivalent fractions.

Answer _____

5 Explain the Steps

Sophia says: To subtract $\frac{2}{3} - \frac{3}{8}$, I rename both fractions with a denominator of 24 and get $\frac{16}{24} - \frac{9}{24} = \frac{7}{24}$.

Verify Sophia's work. Is 24 the LCD, or could she have used a smaller denominator? Explain.

Verification and Explanation _____
