

Name: _____

Date: _____

Solve each problem. Show your work in the box.

Write your final answer on the answer line (or in the blanks shown).

Use the strategies you learned in Lesson 5.04.05.

1 Add Mixed Numbers – Part 2 Practice

Add. Simplify all answers.

$$6\frac{2}{3} + 4\frac{5}{6} = \underline{\hspace{2cm}} \quad | \quad 7\frac{3}{8} + 2\frac{3}{4} = \underline{\hspace{2cm}} \quad | \quad 8\frac{4}{5} + 3\frac{7}{10} = \underline{\hspace{2cm}}$$

Answers _____

2 Three Addends

Add three mixed numbers. Show each step.

$$1\frac{1}{2} + 2\frac{1}{3} + 3\frac{1}{6} = \underline{\hspace{2cm}} \quad | \quad 2\frac{3}{4} + 1\frac{1}{2} + 3\frac{1}{8} = \underline{\hspace{2cm}}$$

Answers _____

3 Choose a Strategy

Solve using the method of your choice. Show all steps.

$$5\frac{7}{12} + 4\frac{3}{4} = \underline{\hspace{2cm}} \quad | \quad 9\frac{5}{6} + 2\frac{4}{9} = \underline{\hspace{2cm}}$$

Answers _____

4 Fencing Project

Sophia needs $3\frac{1}{2}$ feet of wood for one side of a planter box and $2\frac{3}{4}$ feet for the other side.

She buys one 7-foot board. Is it long enough? Show your work.

Answer _____

5 Explain Regrouping

Mira adds $4\frac{5}{6} + 3\frac{3}{4}$ and gets $8\frac{7}{12}$ as her final answer by adding whole numbers ($4 + 3 = 7$) and fractions ($\frac{5}{6} + \frac{3}{4} = \frac{10}{12} + \frac{9}{12} = \frac{19}{12} = 1\frac{7}{12}$) then combining ($7 + 1\frac{7}{12} = 8\frac{7}{12}$).

Is Mira correct? Verify her answer. Explain why the fractional sum needed to be regrouped.

Verification and Explanation _____
