

Name: _____

Date: _____

Solve each problem. Show your work in the box.

Write your final answer on the answer line (or in the blanks shown).

Use the strategies you learned in Lesson 5.05.07.

1 Multiply Mixed Numbers – Convert First

Convert to improper fractions, multiply, then convert back.

$$1\frac{1}{2} \times 2\frac{1}{3} = \underline{\hspace{2cm}} \quad | \quad 2\frac{1}{4} \times 1\frac{1}{3} = \underline{\hspace{2cm}}$$

Answers _____

2 More Mixed Number Multiplication

Find each product. Write in simplest form.

$$3\frac{1}{2} \times 2\frac{2}{5} = \underline{\hspace{2cm}} \quad | \quad 4\frac{1}{3} \times 1\frac{1}{2} = \underline{\hspace{2cm}} \quad | \quad 2\frac{2}{3} \times 3\frac{3}{4} = \underline{\hspace{2cm}}$$

Answers _____

3 Estimate Then Calculate

Estimate by rounding each mixed number to the nearest whole, then compute the exact answer.

(A) $2\frac{3}{4} \times 3\frac{1}{5}$: Estimate $\approx$ _____; Exact = _____

(B) $5\frac{1}{2} \times 2\frac{2}{3}$: Estimate $\approx$ _____; Exact = _____

SHOW YOUR WORK

Answers _____

4 Room Area

A rectangular room is $4\frac{1}{2}$ meters long and $3\frac{2}{3}$ meters wide.

Find the area of the room. Show your work.

Answer _____

5 Does Rounding Change the Answer?

Sophia estimates $2\frac{7}{8} \times 3\frac{1}{4} \approx 3 \times 3 = 9$. She finds the exact product is $9\frac{11}{32}$.

s exact product by converting to improper fractions. Is her estimate reasonable? Explain why rounding mixed numbers before multiplying sometimes overshoots

Verification and Explanation _____
