

Name: _____

Date: _____

Solve each problem. Show your work in the box.

Write your final answer on the answer line (or in the blanks shown).

Use the strategies you learned in Lesson 5.06.03.

1 Divide a Whole Number by a Unit Fraction

Find the quotient. $3 \div \frac{1}{4} = \underline{\hspace{2cm}}$

2 Divide a Whole Number by a Unit Fraction

Find the quotient. $5 \div \frac{1}{3} = \underline{\hspace{2cm}}$

3 Model the Division

Draw a number line to show $2 \div \frac{1}{5}$. How many fifths are in 2?

Answer: _____

4 Applied

A carpenter has 4 boards. He cuts each board into pieces that are $\frac{1}{6}$ of a board long.

How many pieces does he get in all? Show your work.

Answer: _____

5 Reasoning

Sophia says that when you divide a whole number by a unit fraction, the quotient is always larger than the whole number you started with.

Do you agree with Sophia? Explain why or why not.
