

Name: _____

Date: _____

Solve each problem. Show your work in the box.

Write your final answer on the answer line (or in the blanks shown).

Use the strategies you learned in Lesson 5.07.05.

1 Area of a Complex Figure

A figure is made of a $5\text{ cm} \times 3\text{ cm}$ rectangle and a $5\text{ cm} \times 2\text{ cm}$ rectangle joined along one side.

Find the total area.

Total area: _____

2 Area of a Complex Figure

An L-shaped room has outer dimensions $10\text{ ft} \times 8\text{ ft}$. A $4\text{ ft} \times 3\text{ ft}$ rectangle is cut from one corner.

What is the area of the room? Show your work.

Area: _____

3 Decompose and Solve

A figure is made of a $6\text{ m} \times 4\text{ m}$ rectangle with a right triangle attached to one end. The triangle has a base of 3 m and a height of 4 m.

Find the total area. Show how you decomposed the figure.

Total area: _____

4 Applied

Kai's backyard is shaped like a rectangle ($20\text{ m} \times 12\text{ m}$) with a square patio ($5\text{ m} \times 5\text{ m}$) built in one corner.

What is the area of the grassy part of the yard?

Grass area: _____

5 Reasoning

Explain two different ways you could find the area of an L-shaped figure. Which way do you prefer and why?
