

Name: _____

Date: _____

Solve each problem. Show your work in the box.

Write your final answer on the answer line (or in the blanks shown).

Use the strategies you learned in Lesson 5.08.06.

1 Volume and Capacity

A container holds 2.5 liters of water.

What is the volume of the container in cubic centimeters?

Volume: _____

2 Find the Height of Water

A rectangular tank has a base that is $20\text{ cm} \times 10\text{ cm}$. It contains 1,600 mL of water.

What is the height of the water in the tank?

Height: _____

3 Multi-Step

A cuboid tank ($30\text{ cm} \times 20\text{ cm} \times 25\text{ cm}$) is $\frac{3}{5}$ full of water.

How many milliliters of water are in the tank? Show your work.

Answer: _____

4 Applied

Leo has a box that is $50\text{ cm} \times 40\text{ cm} \times 30\text{ cm}$. He fills it completely with water, then pours the water into 2-liter bottles.

How many 2-liter bottles can he fill completely?

Answer: _____

5 Reasoning

Atlas pours 3 liters of water into a tank that is 15 cm long and 10 cm wide.

What will the height of the water be? Explain your strategy step by step.
