

Name: _____

Date: _____

Solve each problem. Show your work in the box.

Write your final answer on the answer line (or in the blanks shown).

Use the strategies you learned in Lesson 5.13.01.

1 Write a Ratio

In a bag of marbles, there are 5 red marbles and 8 blue marbles.

Write the ratio of red to blue marbles in three ways.

5 to 8; 5:8; $\frac{5}{8}$. _____

2 Part-to-Whole Ratio

A fruit basket has 4 oranges and 6 apples.

Write the ratio of oranges to the total number of fruits. Simplify.

4:10 simplifies to 2:5. _____

3 Ratio from a Recipe

A recipe calls for 2 cups of sugar for every 3 cups of flour.

Write the ratio of sugar to flour. If you use 6 cups of sugar, how many cups of flour do you need?

Ratio = 2:3. Scale factor = $6 \div 2 = 3$. Flour = $3 \times 3 = 9$ cups. _____

4 Simplify the Ratio

A class has 18 girls and 12 boys.

Write the ratio of girls to boys in simplest form.

$$18:12 \div 6 = 3:2. \quad \underline{\hspace{2cm}}$$

5 Reasoning: Kai's Garden

Kai plants 10 tomato plants and 15 pepper plants. He says the ratio of peppers to tomatoes is 2:3.

Is Kai correct? Show the simplification and explain.

Peppers to tomatoes = $15:10 \div 5 = 3:2$. Kai reversed it — the correct ratio of peppers to tomatoes is 3:2.
