

Name: _____

Date: _____

Solve each problem. Show your work in the box.

Write your final answer on the answer line (or in the blanks shown).

Use the strategies you learned in Lesson 5.14.04.

1 Rate Word Problem: Pool

A pool fills at 500 liters per hour. The pool holds 3,000 liters.

How many hours to fill the pool?

$3,000 \div 500 = 6$ hours. _____

2 Rate Word Problem: Road Trip

A family drives 420 km at an average rate of 70 km/h.

How long does the trip take? What is the total time with a 45-minute lunch stop?

Drive time = $420 \div 70 = 6$ hours. Total = 6 hours and 45 minutes. ____

3 Rate Word Problem: Typing

Mira types 45 words per minute. She needs to type a 900-word essay.

How many minutes of typing? What is the total time with a 5-minute break halfway?

$900 \div 45 = 20$ minutes of typing. With break: $20 + 5 = 25$ minutes total. ____

4 Multi-Step Rate Problem

Atlas walks at 4 km/h. He walks 1 hour 30 minutes, rests 20 minutes, then walks 45 minutes.

What is the total distance he walked?

Walk 1: $4 \times 1.5 = 6$ km. Walk 2: $4 \times 0.75 = 3$ km. Total = 9 km. ____

5 Reasoning: Combined Rate

Sophia can sort 120 items per hour. Leo can sort 90 items per hour. They need to sort 630 items together.

How long will it take them working together?

Combined rate = $120 + 90 = 210$ items/hour. Time = $630 \div 210 = 3$ hours. ____
