Solve each problem. Show your work in the box.

Write your final answer on the answer line (or in the blanks shown).

Use the strategies you learned in Lesson 5.15.04.

**1 Fraction to Percentage (Denominator 10 or 100)**

Convert  $7/10$  to a percentage.

Multiply numerator and denominator so the denominator becomes 100.

$$7/10 = 70/100 = 70\%. \quad \underline{\hspace{2cm}}$$

**2 Fraction to Percentage (Divide Method)**

Convert  $3/8$  to a percentage.

Divide the numerator by the denominator, then multiply by 100.

$$3 \div 8 = 0.375. \quad 0.375 \times 100 = 37.5\%. \quad \underline{\hspace{2cm}}$$

**3 Mixed Number to Percentage**

Convert  $1 \text{ and } 3/4$  to a percentage.

Convert to a decimal first, then find the percentage.

$$1 \text{ and } 3/4 = 7/4 = 1.75. \quad 1.75 \times 100 = 175\%. \quad \underline{\hspace{2cm}}$$

**4 Multiple Fractions**

Convert each fraction to a percentage:  $\frac{1}{5}$ ,  $\frac{2}{5}$ ,  $\frac{9}{20}$ ,  $\frac{11}{25}$ .

Show your work for each.

$\frac{1}{5} = 20\%$ ;  $\frac{2}{5} = 40\%$ ;  $\frac{9}{20} = 45\%$ ;  $\frac{11}{25} = 44\%$ . \_\_\_\_\_

**5 Reasoning: Kai's Survey**

In a survey of 25 students, 20 said they prefer pizza for lunch.

What percentage prefer pizza? What fraction does NOT prefer pizza, and what percentage is that?

Pizza:  $\frac{20}{25} = \frac{4}{5} = 80\%$ . Not pizza:  $\frac{5}{25} = \frac{1}{5} = 20\%$ . \_\_\_\_\_
