

Name: _____

Date: _____

Solve each problem. Show your work in the box.

Write your final answer on the answer line (or in the blanks shown).

Use the strategies you learned in Lesson 5.15.05.

1 Percentage of a Number

Find 30% of 200.

Multiply 200 by 0.30.

$$0.30 \times 200 = 60. \quad \underline{\hspace{2cm}}$$

2 Percentage of a Dollar Amount

A jacket costs \$80. It is on sale for 25% off.

How much is the discount? What is the sale price?

$$\text{Discount} = 0.25 \times \$80 = \$20. \text{ Sale price} = \$80 - \$20 = \$60. \quad \underline{\hspace{2cm}}$$

3 10% Strategy

Find 15% of 360 using the 10% strategy.

First find 10%, then find 5%, and add them.

$$10\% \text{ of } 360 = 36. \quad 5\% \text{ of } 360 = 18. \quad 15\% = 36 + 18 = 54. \quad \underline{\hspace{2cm}}$$

4 Tax Calculation

A meal costs \$45. The sales tax is 8%.

How much is the tax? What is the total bill?

Tax = $0.08 \times \$45 = \3.60 . Total = $\$45 + \$3.60 = \$48.60$. _____

5 Reasoning: Sophia's Tip

A restaurant bill is \$60. Sophia wants to leave a 20% tip.

How much should the tip be? Explain two different ways to calculate 20% of \$60.

Method 1: $0.20 \times 60 = \$12$. Method 2: Find 10% = \$6, then double it = \$12. Both give \$12. _
